

Hafesa Group will triple its fleet of vehicles

Hafesa Group, the holding company dedicated to the marketing and distribution of petroleum products, is undertaking an ambitious expansion project that plans to **triple the size of their current fleet of vehicles** by end of 2021. This project, framed within the group's global growth strategy, will allow them to **cover a greater area across both national and international geographies**. The strategy aims to continue guaranteeing the levels of service required to meet the transit and logistic needs for all their clients, by offering them greater geographical coverage and the flexibility to plan and manage all their operations. The new fleet has all the necessary prevention and safety measures and encourages respect for the environment, complying with the European emission regulations for industrial vehicles.

As a token of Hafesa Group's firm commitment to technological innovation, **the new fleet has the most advanced metrological measurement and information systems to control activities in real time**. In the words of Alfredo Gómez, General Manager of Hafesa Group, "We are getting bigger and we are always committed to growing responsibly. We thank our team for allowing us to make this growth a reality through their excellent work and our clients, for trusting in our responsibility once again". **About HAFESA GROUP** Hafesa Group is a holding company dedicated to the marketing and distribution of petroleum products. From importing, to storage and distribution, the gas stations and the home delivery diesel service, we cover all stages of the product cycle.

About the Hafesa Group
